

Get all platform game records v2

* Request address: /api/server/recordAll

* Request protocol: POST

* Request description: * Cannot collect more than 5 times every five minutes * The start time and end time cannot exceed 24 hours (you can get any day within 24 hours, allowing for one day). When orderIds is not empty, the start time and end time can be passed to empty. * The start time cannot be greater than the end time (can be equal to) * If there are many bet records, you can appropriately shorten the collection time and increase the number of records obtained per page to avoid consuming the number of acquisitions each time because each page is too much.

* Request parameters:

Field name	type	Must-choose	illustrate
platType	string	no	Game platform, all platform records are obtained by default (refer to the appendix of "Game Platform")
playerId	string	no	Player account, all player records are obtained by default
currency	string	yes	Currency code, CNY: RMB, USD: USD, HKD: Hong Kong dollar, PHP: Philippine peso
orderIds	string	no	Order number, multiple order numbers are separated by, (please do not pass the time parameters according to the order number)
gameType	string	no	Game type, all types of records are obtained by default (1: video, 2: slot machine, 3: lottery, 4: sports, 5: e-sports, 6: fishing, 7: chess and cards)
