

NG interface API documentation

Massive interfaces

Includes all mainstream interfaces on the market

Multi-currency

BRL (Brazilian Real) CNY (RMB) HKD (Hong Kong Dollar) IDR (Indonesian Rupiah) INR (Indian Rupee) MMK (Myanmar Kyat) NGN (Nigerian Naira) PHP (Philippine Peso) THB (Thai Baht) USD (US Dollar) VND (Vietnamese Dong)

Multi-language

Games that support multiple languages support language parameter passing

Interface domain name: <https://api.ng777.net>

Official domain name: <https://www.neapi.com>

NG interface account registration address: <https://www.neapi.com/zhuce.html>

Interface version: v2

Api Demo: [NG interface phpdemo](#)

Support channel: [Support channel](#)

Interface description:

Parameter	Type	Parameter value	Description
sign	string	Encrypted string	32 lowercase md5 (random + sn + secretKey)
random	string	Random string	16-32 lowercase letters + numbers
sn	string	Fixed string	Merchant prefix, please log in to the management backend to view
Content-Type	string	application/json	Request type

- All interfaces are requested by POST protocol, and the interface needs to be signed. The signature verification method is to set 4 parameters in the request header - Please log in to the management backend to view the parameters sn and secretKey. If you need to apply, please contact the business - random is a random string with a length limit of 16-32 lowercase letters + numbers - sign is the result of String sign=MD5(random+sn+secretKey) - The data return format is unified in Json format - The IP of the request interface Need to add whitelist (can be added by yourself in the management backend) - All data time zones are Beijing time - It is recommended that the request timeout of all interfaces be

set to more than 30 seconds

Request return correct example:

```
{  
  "code": 10000, // Status code, 10000 success, other failures  
  "msg": "request succeeded", // Message  
  "data": null  
}
```

Request return error example:

```
{  
  "code": 10404, // Status code, 10000 success, other failures  
  "msg": "Signature verification failed", // Message  
  "data": null  
}
```
